Whole Grains

Moms of Elementary-School-Aged Children (Age 8-10)

New

Give yourself and those you love the goodness of whole grains. Make at least half of the grains you eat whole grains – such as bread, tortillas, pasta and cereals. Whole grains are good for your heart and digestion, and can help you maintain a healthy weight and good overall health.

Whole grains make a difference. Whole grains help keep your heart healthy and are good for digestion and a healthy weight. Choose foods with “100% whole wheat” or “100% whole grains” on the label. Or check the ingredient list to see if the word “**whole**” is before the first ingredient listed (for example, *whole* wheat flour). If it is, it’s whole-grain.

Start every day the whole grain way. Help your kids get their day off to a healthy start. Serve whole-grain versions of cereal, bread, tortillas or pancakes at breakfast. Whole grains give your kids B vitamins, minerals and fiber to help them feel full longer so they stay alert to concentrate at school.
